

**LAKESIDE**

**Supply Co., Inc.**

**NEW FOR 2007  
AGGRESSIVE ATHLETIC MIX**

**Athletic fields need fast growing, tough wear resistance grasses that can hold up to the summer heat and drought.**

**Lakeside sod Supply introduces our Aggressive Athletic Mix offering aggressive characteristics helpful for providing and maintaining dense, tough turf.**

**Fifty percent of the mix is Thermal Blue & Avalanche Kentucky Blue. Thermal Blue is a heat tolerant Hybrid-cross between Kentucky Blue and Texas Blue Grass. It loves the heat and continues to grow well into summer when other grasses have stopped. Imagine extending the growing season further into the summer. Avalanche is one of the top most aggressive and wear tolerant grasses on the market.**

**The balance is comprised of top performers in perennial rye from the Scotts Company Splendid & Pentium Perennial Rye grass. Speed of establishment and dark green color, and low grow qualities.**

**Put the two together and you have:**

- 1) Improved heat tolerance**
- 2) Better summer performance & growth**
- 3) Faster establishment**
- 4) Extensive Rhizome growth**

**A sure fire mix for the tough Western New York summers on our Athletic fields.**

**25% AVALANCHE KENTUCKY BLUE  
25% THERMAL BLUE  
50% SPLENDID & PENTIUM PERENNIAL RYEGRASS  
SEED RATE 3-4 LBS PER 1000 SQ. FT.**
