

PRODUCT DESCRIPTION SHEET
LAKESIDE KENTUCKY BLUEGRASS BLEND

Our Bluegrass Blend is adapted to this region and is designed to provide a high quality, dense, hardy turf for use in golf course fairways, tees or collars, home lawn, athletic fields, industrial sites, cemeteries and other similar turf areas.

The continued fine performance of this turf depends greatly on a good maintenance program and with proper management, a dense uniform quality turf will remain for many years to come.

Performance Characteristics

- Tolerance to local climate extremes and varying soil types
 - Uniform color, texture and growth habits
- Medium to dark green color retention throughout the growing season
 - Performs well under high or close mowing heights
 - Excellent wear tolerance
 - Moderate shade tolerance
- Dense, low growing, tightly knit turf providing excellent lawn characteristics

Characteristics

- Grown on mineral soil
- High tolerance to powder mildew, dollar spot, stripe smut and rust
